HAND DELIVERY

Borough of Conshohocken
Attn: Stephanie Cecco, Borough Manager
400 Fayette Street, Suite 200
Conshohocken, PA 19428

**RE: 450 Colwell Lane - Application for Conditional Use
Dryden Court Development, LLC - Multi-family Development Stacked Condos
Our Reference No. 16140.009**

Dear Ms. Cecco:

I represent Dryden Court Development, LLC (“**DCD**”). As evidenced by the Deed attached hereto, DCD is the legal owner of the property located at 450 Colwell Lane, Conshohocken, PA (“**Property**”). In accordance with the Borough of Conshohocken Zoning Ordinance (“**Zoning Ordinance**”) and Borough of Conshohocken Zoning Map the Property is located in the LI-Limited Industrial Zoning District.

As recently discussed with the Borough’s staff, DCD proposes to develop the Property for modern, multi-family housing (“**Proposed Use**”). In accordance with Section 1901-B of the Zoning Ordinance, the Proposed Use is a specifically permitted use of Property by conditional use. As detailed on the enclosed plans, and Application, the Proposed Use consists of 48 stacked condo dwelling units within three multi-family buildings.

Enclosed is DCD’s application for conditional use approval (“**Application**”). The Application consists of the following materials:

- Borough of Conshohocken Zoning Application;
- Conditional Use Plan Set, prepared by Joseph M. Estock, PE consisting of three (3) sheets; sheet 1 entitled “Sketch Plan D”, sheet 2 entitled “Existing Features Plan”, and sheet 3 entitled “Aerial Photograph, all dated December 22, 2020;
- Landscape and Lighting Plan Set, prepared by CMC Engineering, consisting of two sheets dated December 29, 2020;

- Traffic Impact Study, prepared by McMahon Associates, Inc., dated December 28, 2020;
- Architectural Plans, entitled “Dryden Court Condos” consisting of 3 sheets;
- A check in the amount of \$500.00 payable to the Borough of Conshohocken representing the applicable Conditional Use Application Fee; and
- A check in the amount of \$750.00 payable to the Borough of Conshohocken representing the applicable Conditional Use Escrow Deposit.

As set forth in the Borough’s “Zoning Application Filing Procedures”, in addition to the above referenced Deed, I am enclosing an original, signed and notarized Application as well as twelve (12) additional copies thereof.¹ Please retain the original and eleven copies for your own purposes. Please timestamp and return the remaining copy for my records. An electronic copy of the Application will also be delivered to the Borough contemporaneously herewith by electronic transmission.

Please schedule the Application for consideration by the Borough’s Planning Commission at its next available, regularly scheduled meeting date. Please also schedule a hearing on the Application before Borough Council. Kindly provide notice of the scheduling of the meeting and hearing and provide copies of all reviews, correspondence and communications generated and/or received regarding this matter.

If you require anything further or have any questions, please contact me at your convenience.

Best Regards,

Craig R. Lewis

Enclosures

cc (via e-mail w/ enclosures): DJB Properties, LLC
Michael E. Peters, Esq.
Eric P. Johnson, PE, Zoning Officer

¹ The Traffic Impact Study consists of 35 pages. The appendices to the Traffic Study consist of an additional 181 pages. Therefore, I am enclosing only four copies of the appendices. The appendices will be provided electronically, and additional hard copies will be provided if requested

BOROUGH OF CONSHOHOCKEN

Zoning Application

Application: _____
Date Submitted: _____
Date Received: _____

1. Application is hereby made for:

- Special Exception Variance
- Appeal of the decision of the zoning officer
- Conditional Use approval Interpretation of the Zoning Ordinance
- Other _____

2. Section of the Zoning Ordinance from which relief is requested:

Section 27-1901-B - modern multi-family housing units in the Limited Industrial District by Residential Overlay

3. Address of the property, which is the subject of the application:

450 Colwell Lane, Conshohocken, PA 19428

4. Applicant's Name: Dryden Court Development, LLC

Address: c/o DJB Properties, LLC, 1125 Robin Road, Gladwyne, PA 19035

Phone Number (daytime): 610-310-5055

E-mail Address: djbprop@gmail.com

5. Applicant is (check one): Legal Owner Equitable Owner ; Tenant

6. Property Owner: Dryden Court Development, LLC

Address: c/o DJB Properties, LLC, 1125 Robin Road, Gladwyne, PA 19035

Phone Number: 610-310-5055

E-mail Address: djbprop@gmail.com

7. Lot Dimensions: irregular (approx 390' x 238') Zoning District: LI - Limited Industrial

8. Has there been previous zoning relief requested in connection with this Property?

Yes No If yes, please describe.

Applicant is unaware of any prior zoning relief sought, or granted fro this property.

9. Please describe the present use of the property including any existing improvements and the dimensions of any structures on the property.

The property is presently improved with a one-story warehouse building and associated parking facilities which are depicted on the attached existing conditions plan prepared by Joseph Estock. The existing warehouse is presently vacant. As depicted on the existing conditions plan access to the warehouse is from a single driveway from Colwell Lane that also provides access to the adjacent property. Parking for the warehouse is located along the southern boundray of the property. Both the existing access and portions of the existing parking are located in the 100-year floodplain and thus are currently non-conformign to the requirements of the Floodplain Conservation District.

10. Please describe the proposed use of the property.

Applicant proposes to demolish the existing warehouse and redevelop the property for modern, multi-family housing as depicted on the attached conditional use plans prepared by Joseph Estock. Multi-family housing is permitted in the LI District in accordance with the Residential Overlay district where conditional use approval is obtained in accordance with Section 27-1901-B of the Zoning Ordinance.

11. Please describe proposal and improvements to the property in detail.

As depicted in greater detail on the attached Conditional Use Plans prepared by Jospheh Estock, applicant proposes to demolish the existing warehouse and redevelop the property for three (3) modern, multi-family buildings. Each building will be three-story stacked condos and the development will have a total of 48 dwelling units. Each unit will share an exterior access with one other unit while the remainder of the paired units will be located above and/or below each other. Each unit is served by a 1-car garage as well as one designated parking space behind its designated garage. The existing parking along the southern boundary will remain and will provide supplemental guest parking. The development will be served by two vehicular access points. The principal access being from 5th Avenue with the existing access along Colwell Lane remaining as a secondary access point.

12. Please describe the reasons the Applicant believes that the requested relief should be granted.

Multi-family housing is a specifically permitted use in the LI-District in accordance with Section 27-1901-B of the Residential Overlay District. As will be demonstrated by exhibits and testimony at the hearing in this matter, the proposed development satisfies all of the applicable criteria for the requested conditional use as well as the general criteria applicable to all conditional uses.

13. If a Variance is being requested, please describe the following:

a. The unique characteristics of the property: n/a

b. How the Zoning Ordinance unreasonably restricts development of the property:
n/a

c. How the proposal is consistent with the character of the surrounding neighborhood. n/a

d. Why the requested relief is the minimum required to reasonably use the property; and why the proposal could not be less than what is proposed.
n/a

14. The following section should be completed if the applicant is contesting the determination of the zoning officer.

a. Please indicate the section of the zoning ordinance that is the subject of the zoning officer's decision (attach any written correspondence relating to the determination).

n/a

b. Please explain in detail the reasons why you disagree with the zoning officer's determination.

n/a

15. If the Applicant is requesting any other type of relief, please complete the following section.

a. Type of relief that is being requested by the applicant.

n/a

b. Please indicate the section of the Zoning Ordinance related to the relief being requested.

n/a

c. Please describe in detail the reasons why the requested relief should be granted.

n/a

16. If the applicant is being represented by an attorney, please provide the following information.

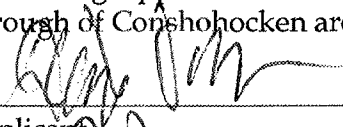

a. Attorney's Name: Craig R. Lewis, Esquire

b. Address: Kaplin Stewart, 910 Harvest Drive, Suite 200, Blue Bell, PA 19422

c. Phone Number: (610) 941-2584

d. E-mail Address: RLewis@kaplaw.com

I/we hereby certify that to the best of my knowledge, all of the above statements contained in this Zoning Application and any papers or plans submitted with this application to the Borough of Conshohocken are true and correct.

HAND DELIVERY

Borough of Conshohocken
Attn: Stephanie Cecco, Borough Manager
400 Fayette Street, Suite 200
Conshohocken, PA 19428

**RE: 450 Colwell Lane - Application for Conditional Use
Dryden Court Development, LLC - Multi-family Development Stacked Condos
Our Reference No. 16140.009**

Dear Ms. Cecco:

I represent Dryden Court Development, LLC (“**DCD**”). On December 30, 2020 DCD submitted an application for Conditional Use Approval (“**Application**”) for the property located at 450 Colwell Lane, Conshohocken, PA (“**Property**”). The Application proposes to develop the Property for modern, multi-family housing (“**Proposed Use**”) in accordance with Section 1901-B of the Zoning Ordinance.

The Application included all materials required by the Zoning Ordinance including, but not limited to, a Site Plan, Landscape Plan, Traffic Study and architectural plans. The Application was time-stamped and returned on December 30, 2020. As a supplement to the materials submitted with the Application, I am enclosing herewith twelve (12) copies a Post-Construction Stormwater Management Report prepared by Joseph M. Estock, dated December 29, 2020 (“**Stormwater Report**”). An electronic copy of the Stormwater Report will also be delivered to the Borough contemporaneously herewith by electronic transmission.

Conshohocken Borough
January 5, 2021
Page 2

If you require anything additional copies of the Stormwater Report, or have and questions, please contact me at your convenience.

Best Regards,

A handwritten signature in blue ink, appearing to read "Craig R. Lewis". The signature is fluid and cursive, with a long horizontal stroke at the end.

Map Unit Descriptions (450 Colwell Lane)

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Custom Soil Resource Report

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Montgomery County, Pennsylvania

UgB—Urban land, 0 to 8 percent slopes

Map Unit Setting

National map unit symbol: 2dtyq
Elevation: 800 to 1,500 feet
Mean annual precipitation: 36 to 46 inches
Mean annual air temperature: 41 to 62 degrees F
Frost-free period: 130 to 170 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 90 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land

Setting

Parent material: Pavement, buildings and other artificially covered areas human transported material

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8s
Hydric soil rating: No

Minor Components

Udorthents, unstable fill

Percent of map unit: 10 percent
Down-slope shape: Linear
Across-slope shape: Linear
Hydric soil rating: No

MAP PANELS
 Digital Data Available
 No Digital Data Available
 Unmapped

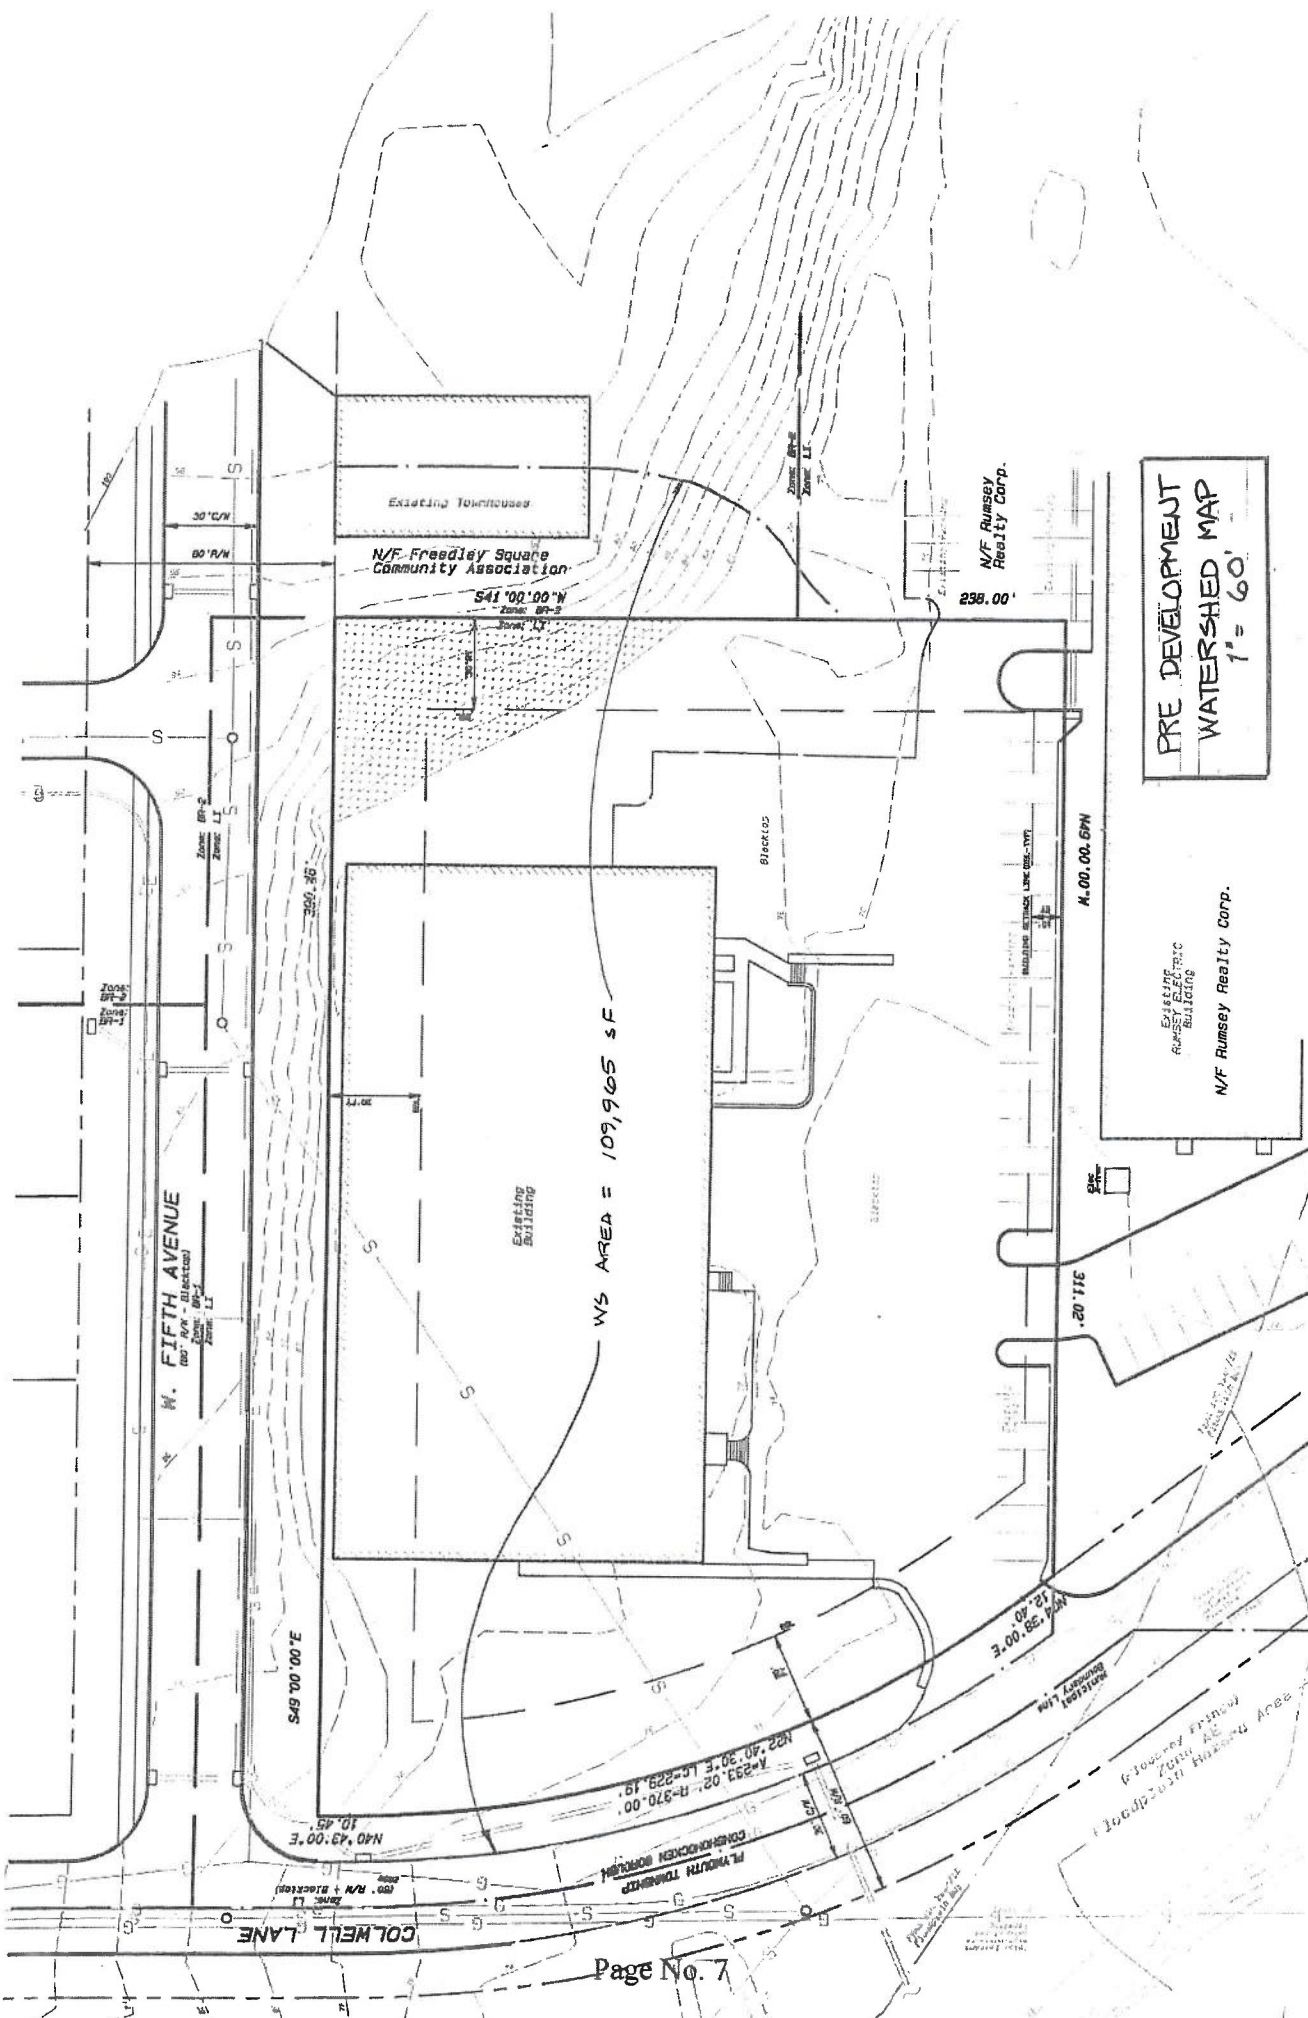

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards.

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/9/2020 at 8:31 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

MEMORANDUM

Stephanie Cecco
Borough Manager

Date: May 20, 2021

To: Stephanie Cecco, Brittany Rogers

From: Eric P. Johnson, PE, Zoning Officer

Re: Revised Determination - 450 Colwell Lane - Stacked Condominiums Conditional Use

History of the Site:

450 Colwell Lane is a 2-acre property located at the corner of Colwell Lane and W. 5th Avenue and is currently developed with a one-story warehouse building and parking lot. The property is bordered to the south by the Rumsey Electric Company property. A 50-foot-wide access easement exist along the southern edge of the 450 Colwell Lane property to provide access to the front parking lot and the rear of the Rumsey Electric property. 450 Colwell Lane is located in the LI - Limited Industrial zoning district and the southwest corner of the property is located in the Floodplain Conservation District. The property would be eligible to be developed by Conditional Use under the Residential Overlay District, provided the requirements of the Overlay District are met.

Current Request:

The applicant, Dryden Court Development, LLC, proposes to demolish the existing warehouse and the majority of the parking lot. The existing driveway from Colwell Lane, parking spaces along the southern property line, and cross access driveways servicing the Rumsey Property are proposed to remain. The applicant proposes to construct a forty-eight (48) unit multifamily residential development consisting of three (3) buildings with one residential units stacked on top of one other residential unit. Each unit would share an exterior access with one other unit. The building facing Colwell Lane would contain ten (10) units, the building facing W. 5th Avenue would contain twenty (20) units, and the building interior to the site would contain eighteen (18) units. The applicant is proposing one garage parking space and one parking space located in front of the garage for each unit. The existing parking along the southern property line is proposed to remain for additional parking.

The applicant is seeking Conditional Use approval in accordance with §27-1901-B of the Conshohocken Zoning Ordinance to permit a multifamily residential development utilizing the Residential Overlay District.

Zoning Determination:

Although the Borough repealed Part 19-B – Residential Overlay District of the Conshohocken Zoning Ordinance on January 20, 2021, the applicant had already submitted the application for the proposed development and therefore has vested rights to seek a Conditional Use for development in accordance with the standards of the Residential Overlay District.

Per §27-1901-B, the intent of the Residential Overlay District is to permit modern multifamily housing units by Conditional Use granted by Borough Council, in order to provide a mix of housing types and options available to Borough residents; and to provide specific performance standards designed to enhance this type of housing and preserve the neighboring residential properties.

Per §27-202, a multifamily dwelling is defined as a detached residential building containing three or more dwelling units. Units may not be arranged entirely in vertical rows (like townhouses) and are generally located entirely above or below one another. Units may share outside access and/or internal hallways, lobbies, and similar facilities. The dwelling units cannot be individually lotted, but instead, share the lot or tract on which the building containing them is located. The development is usually under one operating unit, as a rental or condominium development. The proposed stacked dwelling units which share an access with at least one other unit and in a building with more than three units meets the definition of a multifamily housing unit. The applicant will need to confirm the proposed development would be under one operating unit such as a condominium association.

Conditional Use approval would be required for the proposed multifamily development. In considering the request, Borough Council should take into consideration the performance standards outlined in §27-1903-B and the landscaping / buffering standards outlined in §27-1904-B.

Per §27-1903-B.3.A, the minimum required front yard setback is 30 feet measured from the property line. The proposed dwellings along W. 5th Ave are setback 5 feet from the property line, requiring a variance granted by the Zoning Hearing Board.

Per §27-820, refuse collection facilities detached from a building shall be setback a minimum of 10 feet from all property lines, architecturally compatible with the buildings, and screened with a fence and landscaping. The proposed refuse facility is located approximately 2 feet from the property line and is not landscaped. The facility will need to be relocated or a variance granted by the Zoning Hearing Board.

Per §27-826.B(2), in consideration of the Conditional Use, Borough Council should also consult the comments outlined in the Montgomery County Planning Commissions review letter, dated March 4, 2021.

Per §27-826.B(3), when seeking Conditional Use approval the applicant shall demonstrate at the public hearing, to the satisfaction of Borough Council, that the proposed use shall not be contrary to the public health, safety, and welfare of the community. In particular, the applicant shall demonstrate the adequacy of the proposed vehicular circulation, pedestrian circulation, utilities, buffering and screening, and protection of natural resources.

Per §27-1714, development and redevelopment in the Floodplain Conservation District are prohibited. The southwest corner of the property, including the existing site entrance from Colwell Lane, the cross-property vehicle access to the Rumsey Electric front parking lot, and a portion of the parking spaces along the southern property line are located within the Floodplain Conservation District with a defined flood elevation of 74.3 feet. The applicant is proposing to maintain the existing improvements within the Floodplain Conservation District in order not to require a variance from the Zoning Hearing Board.

Per §27-830, decks are only permitted to be constructed at ground level or first floor of a dwelling. The provided building floor plans indicate decks on the upper levels of the dwellings.

Per §27-824, the submitted Traffic Impact Study should be reviewed by the Borough Traffic Engineer.

The provided site plan indicates a sanitary sewer crossing the property under the warehouse building, which should be relocated prior to redevelopment of the property.

If Conditional Use approval is granted, the proposed development will be required to comply with all applicable zoning code sections and will be subject to review during the Land Development process.

Re: MCPC #21-0034-001
Conditional Use- Dryden Court- 450 Colwell Lane (Apartments)
56 units/ 2.0 acres

Re: MCPC #21-0034-002
Conditional Use- Dryden Court- 450 Colwell Lane (Condos)
48 units/ 2.0 acres
Borough of Conshohocken

Dear Ms. Cecco:

We have reviewed the above both of the referenced conditional use submissions as requested by the borough in an electronic documentation received in this office on February 7, 2021. We forward this letter as a report of our review.

BACKGROUND

Conshohocken Borough has submitted for our review two conditional use submissions for the redevelopment of a 2.0-acre, limited-industrial site located at the corner of Colwell Lane and Fifth Avenue. The applicant David J. Brusso, Dryden Court Development, LLC, seeks conditional use approval for two different development exhibits and plans for a 2.0-acre tract located at the corner of Colwell Lane and Fifth Avenue. Both proposed development plans show the demolition of an existing one-story, 28,800 sq. ft. vacant warehouse building. The first plan (MCPC #21-0034-001) proposes a 3-story apartment building with 56 residential units, with surface parking below the structure. The second submission (MCPC #21-0034-002) proposes 48 stacked condominium/townhouses with a single garage underneath the structure.

The redevelopment tract is Tax Parcel # 05-000010-30-09, which is located in the borough's Limited Industrial Zoning District and in the Residential Overlay District. The conditional use proposal was

submitted prior to the repeal of the Residential Overlay (RO) District provisions by the borough council in January 2021. The Residential Overlay permitted the development of multi-family housing units within the Limited Industrial (LI) District by conditional use and provided for various housing types and dimensional regulations. The regulations permitted a maximum of 33 dwellings units per acre. The borough council, in a decision of January 2021, deleted the entirety of the Residential Overlay (RO) for the Limited Industrial Zoning District. Both of the applicant's conditional use plans use the RO provisions as the basis for their submission.

The Montgomery County Planning Commission, in a review letter dated December 15, 2020, supported the deletion of the Residential Overlay provisions for the area surrounding Colwell Lane. We advised the borough against the deletion of the RO provisions in the other two areas of the borough which lie outside the floodplain corridor of the borough. This was due to our concerns that the deletion may limit potential redevelopment opportunities in those areas.

CONSISTENCY WITH THE COUNTY AND BOROUGH PLANS

Consistency with *Montco 2040- A Shared Vision*

The Conditional Use application is inconsistent with both the future land use vision, goals, and intent of *Montco 2040: A Shared Vision*, the comprehensive plan and future land use vision for the county. The plan and Future Land Use Map designates this area as 'Business Area' for future land uses. The designation supports employment-oriented land uses such as offices, research facilities and industrial parks. (Page 83) <https://www.montcopa.org/1579/Montco-2040-Comprehensive-Plan>.

The comprehensive plan for Montgomery County, *Montco 2040: A Shared Vision* recommends that the county and local governments work together to make every effort to limit development in the floodplain and limit the impacts from ever-increasing flood events. The plan recommends that all local floodplain ordinances prohibit fill and buildings within the floodplain, except for redeveloping brownfield sites. The 24/7 human occupation of flood-prone areas presents a greater number of considerations for public safety than does the nearby office developments which provide significantly less exposure to the potential catastrophic impacts of flooding.

Consistency with Conshohocken Comprehensive Plan Update, June, 2018

The Conditional Use proposal for the residential redevelopment appears incompatible with the borough's future vision for this area as stated in the 2018 Comprehensive Plan's Future Conditions Chapter Five and in the Land Use Map #7. The future land use designation from the map shows this site as 'Industrial'. The purpose of this classification according to the plan is, "to provide for the development and redevelopment of office, commercial, business and varying industrial uses," and to "provide desirable locations for those types of industry that are harmonious with and do not constitute a hazard or nuisance to surrounding areas."

RECOMMENDATION

The Montgomery County Planning Commission (MCPC) has significant reservations in providing a recommendation for Conditional Use approval for either of the residential development proposals presented by the applicant for this site. We believe the location and residential development of the site pose many challenges for the public's safety. It is not clear from the submitted exhibits how

these challenges have been taken into consideration by the applicant in the development plans. Most important in our assessment is that the 100 year floodplain lies along the ingress/egress at Colwell Lane and the 500 year floodplain lies within the development's footprint. Our concern is heightened by future flood risks and the recent adoption by Conshohocken Borough which deleted the residential development option for the Limited Industrial District in large measure, due to the hazards posed and the need to protect the public's safety. These issues are discussed in greater detail in the following comments.

COMMENTS

1. Redevelopment of the Limited Industrial Tract

A. Hazard Flood Risk & Impacts

Given the significant challenges posed by potentially damaging flooding that could endanger the public's safety and welfare, we do not believe that residential redevelopment at this site is an appropriate land use. As shown in the accompanying aerial, the site development's Colwell Lane access is adjacent to the 100 year floodplain boundary, and the 500 year floodplain lies within the southern boundary of the shared access driveway and surface parking lot. We suggest the Schuylkill River and Plymouth Creek floodplain and watershed are dynamic natural environments; often flooding events correspond to mapped boundaries, as shown below. Given the documented flood hazard areas and the ever increasing flooding posed by climate change, future flooding may be even greater. The borough will need to consider the impacts of not only past flooding events but future risks of ever-increasing flood events, and the potential impacts on the residential redevelopment of the site. Given these concerns, we believe that the opportunities afforded by the Limited Industrial land uses are more appropriate than a 24/7 human-occupied residential land use.

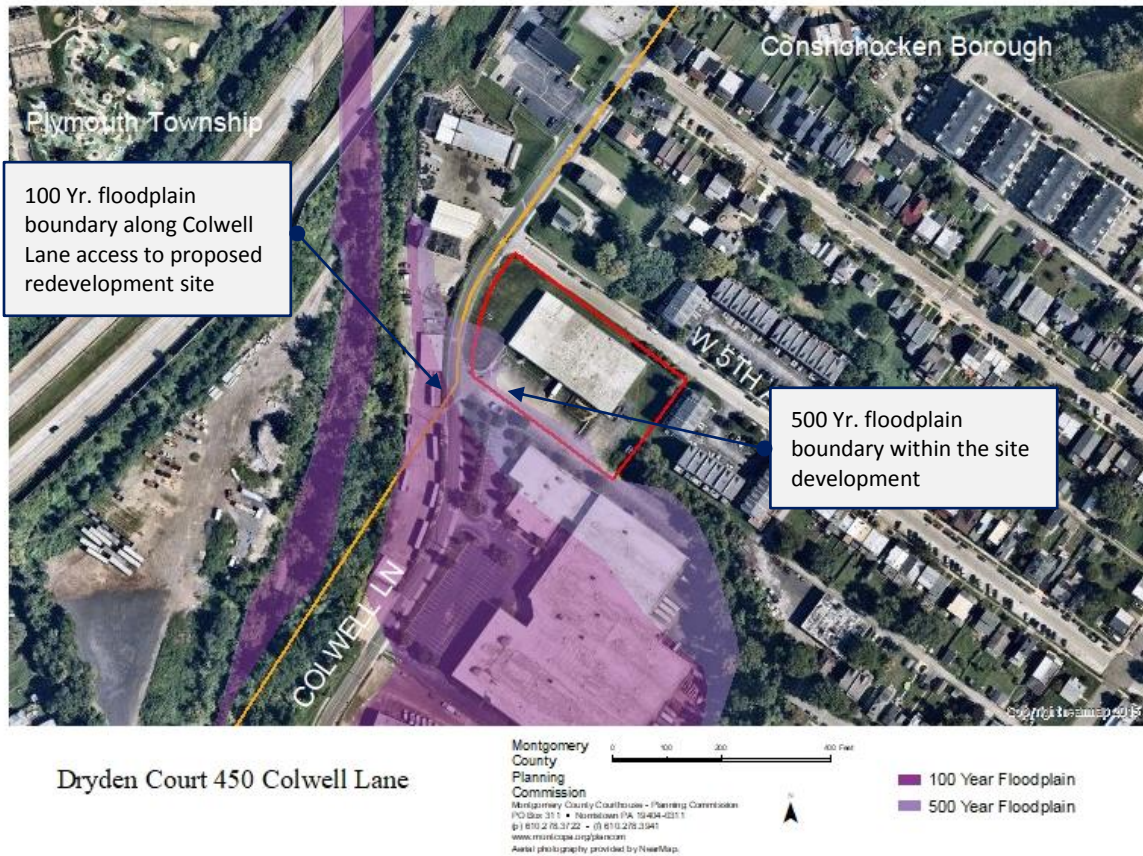

B. Potential Redevelopment Opportunities

We encourage the applicant to seek to redevelop the site within the various permitted uses of the Limited Industrial Zoning District given the environmental constraints and limitations of the infrastructure to support a multi-family residential redevelopment. We support the borough in its efforts to regulate, restrict or prohibit 24/7, human-occupied dwellings within a flood-prone LI- zoned area along Colwell Lane and encourage the applicant to seek an appropriate Limited Industrial use for the redevelopment of this parcel.

2. Residential Development

Should the borough determine that a residential redevelopment of the tract is a viable option we believe the proposed apartment building would be the preferred alternative rather than the stacked townhouse development. Our rationale is explained below. We recommend that an emergency plan be developed by the applicant, stakeholders, and the borough which should be given to each new resident of this development at the time of lease agreement or at property settlement. Many residents will potentially need to evacuate, with both vehicles and pets residing within the structures, some of whom may be out-of-town. The applicant should work

with the township to ensure that an effective evacuation plan for residents and their pets is established.

A. *Dryden Court- Apartment Proposal-(Sketch Plan 'E')*

1. Access & Hazard Mitigation

An apartment dwelling is often a more efficient arrangement when there is a need to evacuate both cars and residents rather than individually-arranged garages and dwelling units shown in this proposal. An apartment development has a more centralized management structure more adapted to emergency response, whereas an individually owned condominium or townhouse development is more decentralized and less responsive. Given the potential for flooding along Colwell Lane we believe that an emergency evacuation plan should be a condition of approval for future development. The Fifth Avenue access route should be the primary access point for residents. In response to the history of flooding along Colwell Lane, we suggest the access driveway that is shared with Rumsey Electrical should have a physical mechanism such as a gate to restrict vehicles when flooding occurs.

2. Site Design

The site design could be improved and more responsive to the pedestrian and connectivity to the borough. It is not clear from the submitted exhibits where the entrance(s) to the building are located and how the building relates to the surroundings. It is a significant issue and an important element in creating a pedestrian-friendly design and connected residential community. We recommend the applicant provide greater details regarding how the site design and the building is connected to the surrounding neighborhood.

B. *Dryden Court- Stacked Townhouses/Condominiums Development (Sketch Plan 'D')*

1. Architecture and Flooding

The architecture of the stacked townhouses/condominiums should plan for the impacts of flooding and address building resiliency. It appears that a single-car, enclosed garage is proposed for each dwelling unit at ground level. We suggest that one way the townhouses could be made more flood-resilient is by constructing the units on a podium base. This strategy uses a common garage area with openings for flooding to occur with less damage than with individual garage units. Shown here is an example of a podium base with a shared garage underneath for the apartments at Riverview at Betzwood (West Norriton Township along the Schuylkill River floodplain).

Riverview at Betzwood, West Norriton Township

2. Adjustment Needed for Townhouses at Drive 'D'

The stacked townhouse arrangement along Drive 'D' (as shown in Sketch Plan 'D') does not provide adequate space between the building's front façade and the parking lot along the front walkway to establish an effective green pervious area needed for shade trees or shrub groupings. Also, the arrangement is not conducive for a pleasant entry-way with the front door

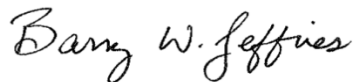

and facades of the townhouse arranged with a view directly facing the Rumsey Electrical commercial building. This is unattractive and does not address the screening and buffering requirements needed with an adjacent commercial building. We recommend that the plan should be adjusted to provide an area wide enough to establish an effective trees and shrub zone to help mitigate the view.

CONCLUSION

The Montgomery County Planning Commission has reservations in offering our support for either of the proposed Conditional Use submissions for the reasons stated above regarding the submission's 'Consistency with County and Borough Plans' and in our review comments. Please note that any recommendations contained in this report are advisory to the borough and final disposition for the approval of any proposal will be made by the borough.

Should the governing body approve either of the conditional use proposals, the planning commission requests that a paper copy of the decision and conditions of approval be supplied to our offices for our files.

Sincerely,

Barry W Jeffries, ASLA, Senior Design Planner

Re: Response to 450 Colwell Lane Comments

The response dated May 18, 2021 from Craig R. Lewis satisfies comments from Emergency Management group with one exception. During the April 23rd meeting, Mr. Brosso had committed to supplying and installing a lockable gate to be lowered during flood conditions on the Colwell Lane driveway to the property. This item was not addressed in the revised plan dated May 12, 2021 or in the correspondence dated May 18, 2021.
